R Module 1 Rubric

This R module is pretty simple; there aren't that many difficult questions. Students should mostly just be able to load and run R Studio.
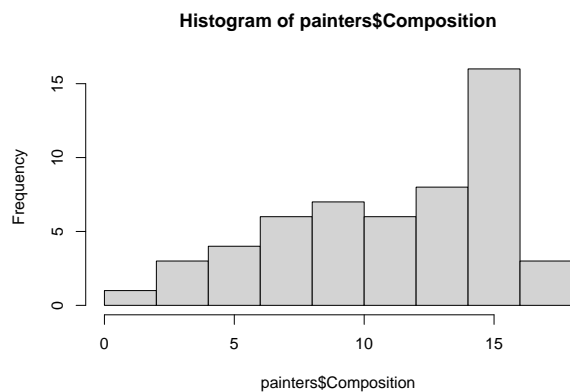

```
# Load data
library(MASS)

head(painters)
```

```
##              Composition Drawing Colour Expression School
## Da Udine              10       8     16          3      A
## Da Vinci              15      16      4         14      A
## Del Piombo             8      13     16          7      A
## Del Sarto             12      16      9          8      A
## Fr. Penni              0      15      8          0      A
## Guilio Romano         15      16      4         14      A
```
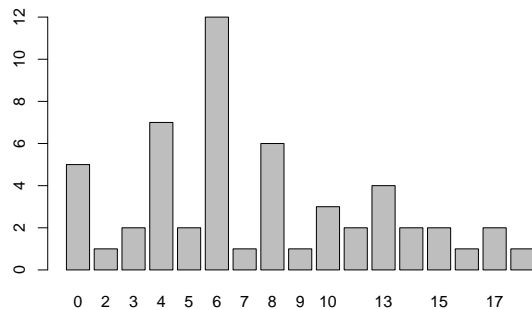

Question 1:

```
hist(painters$Composition)
```

Question 2:

```
barplot(table(painters$Expression))
```

Question 3:

```
pie(table(painters$School))
```
